

TECHNICAL SPECIFICATION

Generator Rating

Radiography 100mA at 100 Kvp
Fluoroscopy 5mA at 100 Kvp

Tube Voltage

Radiography major Kvp 40Kvp to 100 Kvp
Minor Kvp 2Kvp to 10 Kvp
(2Kvp steps)

For Microprocessor

40Kvp to 100 Kvp
(2Kvp steps)

Tube current

Radiography 40mA, 60mA,
80mA, 100mA

For Microprocessor

25mA, 50mA, 100mA

Self - contained Tube Head Specification

Rectification Full-wave, rectified

X - Ray Tube

Stationery Anode, 40khu
(2.8 x 2.8) sq.mm. focal spot

Timer

Radiography 0.02sec. to 05 sec
soild state (24 steps)

For Microprocessor

0.02 sec to 05 sec (stepless)

Power

8 KW

Power Supply

Single Phase 230V 50/60Hz, 10 KVA
0.6 Ohms line resistance

(on a weak power supply line, it is recommended to have 3 phase 415V, 0.06 Ohms resistance, 10kVA line)

Over all dimension

Length 1200mm
Width 650mm
Height 1880mm

Movements

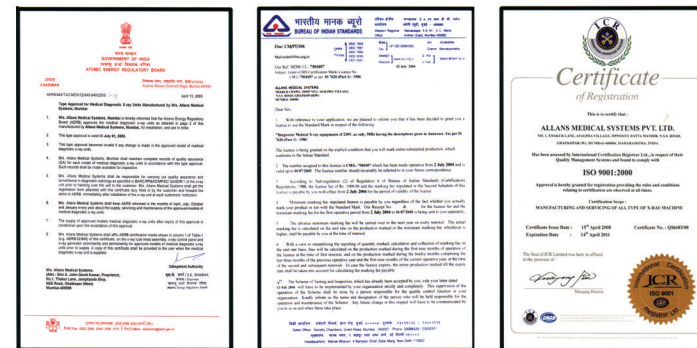

Up/down Fully counter-Balance
Vertical Travel 1300mm
In/Out Travel 400mm
Angular Travel +80 deg
Tube Angulation Full Rotation

Also available in 100mA Rotating anode with F. P. Table

Certifications

BIS 7620 Part I Approved Diagnostic Medical
X - Ray Equipments
AERB Approved for Medical Diagnostic X - Ray units.
ISO Q383411 & ISO 9001-2008

The company have right to make any change in design of specification without prior notice or obligation.

About Allans Medical Systems Pvt. Ltd.....

Established in the year of 1992, Allans has made a name for itself in the biomedical engineering as a leading manufacturer of the X- ray equipments in the country. The company has been appreciated for perfectly engineered X-ray equipment's of excellent quality and high standard workmanship.

The company is managed by team of expert engineers having vast experience in the field of biomedical engineering. The company manufactures quality X-ray equipments from dental to all kind of X-ray machines ranging from 15mA to 500mA. ALLANS has been one of them to give you quality in the Electro medical machines. company's all products are approved by A.E.R.B./B.A.R.C. /B. I. S. (Bureau of Indian Standards) ALLANS is an ISO Certified company.

Conventional panel functions

High quality with affordable price

ALLANS 100i X- Ray machine from Allans Medical Systems have been designed to meet international standard. Easy to operate and will give you all basic radiography needs. The image quality and contrast that you can make perfect opinion. The machine is designed for easy mobility through lifts & narrow corridors into I.C.U., OTS & wards. ALLANS 100i can be an asset to your clinic, polyclinics, Nursing home & Hospital.

ALLANS 100i is at par with the best qualityAt prices that you can afford.

Functions Features

- Semi feather touch control panel
- Electronic solid state timer with 24 steps.
- Independent Kvp, mA & mAs display.
- Line voltage/mA meter for voltage adjustment
- X-Ray exposure on audible tone.
- Main ON/OFF Feather touch membrane button.
- Overload function to protect the tube.
- Counter balanced mechanism & 3 wheel design for max. Mobility & manoeuvrability.
- Horizontal and vertical travel of arms for better positioning.
- Collimator operation from control panel.

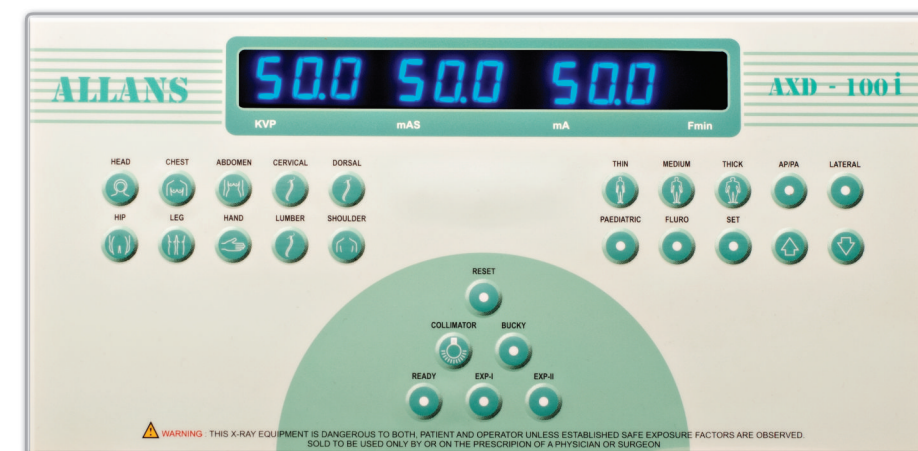

Utility

The machine is ideal for X-Ray's of chest , skull, extrimities and special investigation including Barium IVP & routine orthopedic examinations.

Also available in 60mA.
